Normally, Competitive Service Indian Preference applicants will be rated in accordance with the Office of Personnel Management (OPM) Qualification Standards Handbook; however, these applicants who wish to be considered under the ESEP will be rated separately under the IHS Excepted Service Qualification Standards, or under both standards, if requested. All Non-Indian Preference applicants will be considered under OPM Qualification Standards. The two Qualification Standards are essentially the same; however, any Time-In-Grade requirements will not apply to ESEP/DHA applicants. Your description of work experience, level of responsibility, and accomplishments will be used to determine that you meet these requirements.

QUALIFICATIONS REQUIRED:

Basic Requirements:

Degree: Doctor of Medicine or Doctor of Osteopathy from a school in the United States or Canada approved by a recognized accrediting body in the year of the applicant's graduation. [A Doctor of Medicine or equivalent degree from a foreign medical school that provided education and medical knowledge substantially equivalent to accredited schools in the United States may be demonstrated by permanent certification by the Educational Commission for Foreign Medical Graduates (ECFMG*) (or a fifth pathway certificate for Americans who completed premedical education in the United States and graduate education in a foreign country).]

*Possession of a valid and current U.S. professional license by a graduate of a foreign professional school or program is sufficient proof that the foreign education has been determined to be equivalent to the requisite U.S. professional education in that occupational field.

Graduate Training: Subsequent to obtaining a Doctor of Medicine or Doctor of Osteopathy degree, a candidate must have had at least one year of supervised experience providing direct service in a clinical setting, i.e., a one-year internship or the first year of a residency program in an institution accredited for such training. Graduate training programs include only those internship, residency, and fellowship programs that are approved by accrediting bodies recognized within the United States or Canada. Listings of accredited programs are published yearly in the Directory of Residency Training Programs and the Yearbook and Directory of Osteopathic Physicians.

- An Internship program involves broadly based clinical practice in which physicians acquire experience in treating a variety of medical problems under supervision (e.g., internal medicine, surgery, general practice, obstetrics-gynecology, and pediatrics). Such programs are in hospitals or other institutions accredited for internship training by a recognized body of the American Osteopathic Association.
- A residency program involves training in a specialized field of medicine in an institution accredited for training in the specialty by a recognized body of the American Medical Association (AMA) or the American Osteopathic Association (AOA).
- A fellowship program involves advanced training (beyond residency training) in a given medical specialty in either a clinical or research setting in a hospital or other institution accredited in the United States for such training.

- *Clinical and Training Programs*-Within Federal clinical and training programs, **Specialist positions require** graduate training and experience related to the specialty and subspecialty of the position to be filled. Experience may not be substituted for training essential for performing specialized duties. The length and content of residency programs depends upon the specialization and requirements of recognized accrediting American medical specialty boards. These boards are authorized to conduct examinations to determine the competence of physicians in the specialty, to issue certificates of qualification, to participate in evaluating the quality of residency programs, and to determine the requirements for certification.

Specialist Positions: Medical officers in clinical and training programs are generally concerned with individual specialties such as anesthesiology, dermatology, emergency medicine, family practice, immunology and allergy, internal medicine, neurology, nuclear medicine, obstetrics-gynecology, ophthalmology, otolaryngology, pathology, pediatrics, physical medicine and rehabilitation, preventive medicine, psychiatry, radiology, surgery, and urology.

GS-13: 3 years of residency training in the specialty of the position to be filled or equivalent experience and training *

GS-14: 4 years of residency training in the specialty of the position to be filled or equivalent experience and training.*

GS-15: 5 years of residency training in the specialty of the position to be filled or equivalent experience and training.*

* Applicants must clearly show possession of training and experience equivalent to the specified residency requirements.

TIME-IN-GRADE REQUIREMENTS: MPP candidates must have completed at least one year of service at GS-12 for GS-13, and one year of service at GS-13 for GS-14, and one year of service at GS-14 for GS-15. **Time-in-grade provisions do not apply under ESEP/DHA.**

This will determine the *highly* qualified applicants among the *basically* qualified eligibles. Measurement of possession of the KSA's will be accomplished through review of the Application forms, performance appraisals (MPP candidates only), the "Ranking Factors for Medical Officer" related to the KSA's, employment interviews and reference check results.
